

DESIGN PITCH-1: upload your slides for compiling by the TA!

To ensure we can get through all your presentations on time, please upload your DESIGN PITCH slides by **8:00 AM on the day of the pitch** in **PowerPoint (.pptx) with videos embedded** (not linked).

The TA will then compile all the files into one PowerPoint deck to save time.

We will likely ask you to repeat the same procedure of uploading your files in the morning for **DESIGN PITCH-2 and DESIGN PITCH-3**.

Presentation requirements:

You have 2 minutes total to present your 3 slides:

- **Slide 1:** name & logo for your design; best image of it with stakeholder(s) (10 sec.).
- **Slide 2:** auto-play loop 3 videos of 3 physical prototypes from morph. chart (50 sec.).
- **Slide 3:** one of the three videos - the one you think is best. Why? (60 sec.)

Quick checks before you upload:

1. Make sure all videos are embedded, not linked.
2. If you use audio, confirm it plays clearly through laptop speakers.

How to embed a video in PowerPoint

- Windows: Insert → Video → This Device → select your .mp4 → Insert.
- Mac: Insert → Video → Movie from File → select your .mp4 → Insert.

After inserting, select the video and set playback to **Automatically** under the Playback tab. Detailed tutorial: <https://support.microsoft.com/en-us/office/insert-and-play-a-video-file-from-your-computer-f3fcbd3e-5f86-4320-8aea-31bff480ed02>

File naming: FirstnameLastname_Pitch1.pptx
